Product description

With a Euro standard of 1200 x 800 mm, this steel mesh box is optimally adapted to common logistics standards. The painted surface provides effective protection against external influences. The wire mesh box has a half-folding side wall, which makes it easy to load and unload. The side walls are fitted with a wire mesh (50 x 50 x 4.0 mm) to ensure good ventilation. With dimensions of 1240 x 835 x 970 mm and a load capacity of 1000 kg, it is extremely robust. Stackability up to 3000 kg makes the mesh box pallet extremely efficient and space-saving. Stability is ensured by the wooden floor in combination with the steel walls. This also protects your goods from knocks and damage during storage and transportation. The steel walls of the storage box ensure a robust construction and guarantee a long service life. The runners of this transport container ensure easier transportation and facilitate storage.

Specifications

Article arrangement: New
Version: with runners
Walls: mesh 50*50*4 mm
Euronorm (mm): 1200 x 800
Ral colour: 7030
Length (mm): 1240
Width (mm): 835
Height (mm): 970
Insertion height (mm): 100
Loading capacity (kg): 1000
Weight (kg) 61
Type number: 003
EAN Code (Gtin) 8719424034790

Type: fixed construction stackable
Material: steel
Floor: wooden and steal profiles
Colour: grey
Surface treatment: painted
Internal length (mm): 1220
Internal width (mm): 790
Useful height (mm): 800
Stackable height (mm): 935
Volume (ltr): 761
Stacking load (kg): 3000
Additional specifications: with 2 strips between the feet
