## Technical information

**Productnumber : 61-MPBE400**

### Product description

The 4-piece wooden collars (block pallet format) are a flexible, cost-effective and environmentally friendly alternative to traditional packaging systems. The pallet boxes are used in various (internal) logistics applications. Think of e-waste boxes, big bag holders, retail product displays, collapsible bulk container (with funnel bottom), potato crates and flower bulb export boxes.

The wood is made of 20 mm thick and 95 mm wide Northern European Spruce (ISPM15 certified). The gap between the planks is 85 mm. The steel structure on the top and bottom consists of 2 mm galvanized steel edges. The walls can be attached to pallets by means of centering plates and lock hooks, whereby the rubber spring block in the lock hook ensures a firm closure (board thickness of 20 mm). The top of the steel edges are fitted with steel lips (two per wall) making the pallet boxes stackable.

Load capacity:

- Static: 1500 kg
- Dynamic: 1000 kg
- Racking: 1000 kg
- Stacking: 1000 kg (max. 5 boxes or 5000 kg or 4.5 meters high)

### Specifications

Article arrangement: New

Version: 4-part

Euronorm (mm): 1200 x 1000

Width (mm): 1000

Loading capacity (kg): 1500

Type number: 61-MPB

EAN Code (Gtin) 8719424151619

Type: foldable construction stackable

Material: wood with structure steel

Length (mm): 1200

Height (mm): 400

Weight (kg) 24

Additional specifications: without pallet
