

Technical information

Productnumber : 40-S-3022-4E

Product description

Safe storage of small packages

Rack with four levels and one collection tray. The drip tray has a capacity of 200 litres. The rack is made of hot-dip galvanized steel and has a load capacity of 150 kg per level.

- collection trays made of 3 mm sheet steel
- simple construction due to pluggable system without screws
- 1000 x 600 x 2000 mm (WxDxH)
- 4 compartment levels, load capacity per compartment 150 kg with evenly distributed load

Specifications

Article arrangement: New

Version: basic shelf with 4 levels (4 levels+retention basin)

Subgroup: Racks

Surface treatment: galvanized

Width (mm): 800

Weight (kg) 94

Type number: 40-S-3022

EAN Code (Gtin) 8719424006001

Type: Shelves with retention basins

Material: steel

Colour: colorless

Length (mm): 1200

Height (mm): 2360

Collection volume (ltr): 200

Additional specifications: load capacity per level 150 kg with uniformly distributed load
