Product description

Plastic (GRP) collection bin suitable for four 200-litre steel or plastic drums.

GRP sump trays are ideal for the storage of environmentally hazardous substances. GRP (Glassfibre Reinforced Polyester) is a universally applicable material for the storage of environmentally hazardous substances. The thermosetting plastic base structure combined with the glass fibre reinforcement ensure favourable fire behaviour and high chemical resistance. GRP sump trays combine the properties of steel and plastic. Due to their absolute corrosion resistance, GRP sump trays can be placed directly on the ground. The low installation height facilitates use in factories and workshops.

Caution! Contains ink residues.

Specifications

Article arrangement: Used

Version: for 4x 200 litre steel /plastic drums

Subgroup: Retention Basin used

Surface treatment: signs of use

Width (mm): 1280

Volume (ltr): 290

Type number: RC-ZR

Type: Retention Basin

Floor: oil- and water tight

Colour: grey

Length (mm): 1280

Height (mm): 180

Weight (kg) 18
