Product description

Used roll container with a 4-high a-frame. With the a-frame design, the roll containers are nestable, reducing the volume of the roll containers when not in use. With double door, where each half can be opened separately, it offers optimal accessibility to the contents, allowing efficient loading and unloading. The four rubber wheels ensure smooth mobility and stability, even under heavy loads. With a diameter of 100 mm for the swivel castors and 125 mm for the fixed castors, they offer a balanced combination of manoeuvrability and stability. The use of rubber ensures grip on various surfaces and minimises noise while moving.
