Technical information

Productnumber : 13-L120768

Product description

Black plastic transport roller with a 600x400 base with an open bottom and a coupling piece. This allows several dollies to be linked together like a train. This allows more goods to be transported at once. Manoeuvring several dollies at once in this way requires minimal effort. Thanks to a small turning radius of 450 mm, trains of dollies can be navigated easily through your supply chain. A practical undercarriage for transporting stacking bins, Euronorm bins or, for example, meat crates. Suitable for euronorm 60x40 cm or 2 40x30 cm industrial bins. Fitted with 4 thermoplastic rubber swivel castors 100 mm in diameter for smooth running. The dolly is loadable up to 300 kg when evenly distributed. Made from recycled plastic as standard, making it environmentally friendly and cost-effective. Are you temporarily not using the undercarriages? This undercarriage is designed with recesses in the bottom to keep the wheels in place when stacking between them up to 2.3 metres high. This saves a lot of space in your workshop or warehouse.

Also available in other colours or with other wheels on request, please contact us for the possibilities.

Specifications

Article arrangement: New

Version: connectable, suitable for euro boxes 600x400 mm

Floor: open construction

Wheels back: 2 castor wheels thermoplastic rubber, 100 mm

Colour: black

Length (mm): 600

Height (mm): 174

Weight (kg) 3.8

Temperature resistance: -20 /+40°C

EAN Code (Gtin) 8719424227956

Type: roll platform

Material: polypropylene

Wheels front: 2 castor wheels thermoplastic rubber, 100 mm

Euronorm (mm): 600 x 400

Ral colour: 9004

Width (mm): 400

Loading capacity (kg): 300

Type number: 13-L1207

Additional specifications: connectable
