Product description

Drum transport trolley with a collection volume of 54 litres. This warehouse trolley consists of a powder-coated frame, a collection tray and four wheels. The cart is equipped with two braked swivel castors and two fixed castors. The maximum load capacity is 600 kg.

Guideline for storage and temporary storage for drip trays with regard to fire safety, occupational safety and environmental safety in accordance with PGS 15 (publication series of hazardous substances):

A storage facility must be constructed in such a way that leaked or spilled hazardous liquid is collected in a container captured. To this end, the collection container must have a capacity of at least 110% of the largest package. However, if 10% of the total content of the packages is more than 110% of the content of the largest package, then the collection capacity must be equal to 10% of the total content of the packages together. The collection container must be sufficiently resistant to the stored liquids.

The collection capacity only applies to liquids. Empty, uncleaned packaging does not count. The collection facility may also be realized in storage. The choice of location for the collection facility may depend on the hazardous liquids stored. Kruizinga.nl is not liable for the type of use!

Please note! Any form of modification is not allowed. If this is the case, all regulations will lapse.

Specifications

Article arrangement: New

Version: fixed construction

Floor: receptacle with galvanized grid

Wheels back: 2 castor wheels, polyamide, 125 mm, with brake

Ral colour: 5007

Length (mm): 1380

Width (mm): 661
