Product description

Black plastic drip tray with a capacity of 120 litres. This is a drip tray with grid. When not in use, these bins stack very well and save space.

Guideline for storage and temporary storage for drip trays with regard to fire safety, occupational safety and environmental safety in accordance with PGS 15 (publication series of hazardous substances):

A storage facility must be constructed in such a way that leaked or spilled hazardous liquid is collected in a container. To this end, the collection container must have a capacity of at least 110% of the largest package. However, if 10% of the total content of the packages is more than 110% of the content of the largest package, then the collection capacity must be equal to 10% of the total content of the packages together. The collection container must be sufficiently resistant to the stored liquids.

The collection capacity only applies to liquids. Empty, uncleaned packaging does not count. The collection facility may also be realized in storage. The choice of location for the collection facility may depend on the hazardous liquids stored. Kruizinga.nl is not liable for the type of use!

Please note! Any form of modification is not allowed. If this is the case, all regulations will lapse.

Specifications

Article arrangement: New

Version: modular leakingbucket, with grid - 120 liter

Floor: with plastic grid

Colour: black

Width (mm): 800

Loading capacity (kg): 500

Weight (kg) 12.8

Additional specifications: hygienic, smoke neutral

Type: Retention Basin

Material: polyethylene

Subgroup: Plastic trays

Length (mm): 1200

Height (mm): 180

Volume (ltr): 120

Type number: 48-107-R

EAN Code (Gtin) 8719424065435
