Technical information

Productnumber : 412V-470

Product description

Galvanized steel drip tray suitable for twelve 200 liter drums. The collection tray is made of painted steel and the grille of hot-dip galvanized steel. The collection volume is 470 litres. The brackets on the underside make it easy to move the drip tray by a forklift or pallet truck.

Guideline for storage and temporary storage for drip trays with regard to fire safety, occupational safety and environmental safety according to PGS 15 (publication series hazardous substances):

A storage facility must be constructed in such a way that leaked or spilled hazardous liquid is collected in a container. To this end, the collection container must have a capacity of at least 110% of the largest package. However, if 10% of the total content of the packages is more than 110% of the content of the largest package, then the collection capacity must be equal to 10% of the total content of the packages together. The collection container must be sufficiently resistant to the stored liquids.

The collection capacity only applies to liquids. Empty, uncleaned packaging does not count. The collection facility may also be realized in storage. The choice of location for the collection facility may depend on the hazardous liquids stored. Kruizinga.nl is not liable for the type of use!

Please note! Any form of modification is not allowed. If this is the case, all regulations will lapse.

Specifications

Article arrangement: New
Version: for 12 x 200 litre drums
Walls: walls closed
Top: 1000kg/m²
Colour: colorless
Length (mm): 3880
Height (mm): 200
Weight (kg) 291
Type number: 410-395
EAN Code (Gtin) 8719424007831

Type: receptacle for drum
Material: steel
Floor: with galvanized grid
Subgroup: retention basin steel
Surface treatment: galvanized
Width (mm): 1300
Volume (ltr): 470
Collection volume (ltr): 470
Additional specifications: StawaR approved (DE)
