

## Technical information

**Productnumber : 411DV**

### Product description

Galvanized steel drip tray suitable for one 200 liter drum. The capacity of this container is 223 liters. The drip tray is made of hot-dip galvanized steel.

Guideline for storage and temporary storage for drip trays with regard to fire safety, occupational safety and environmental safety according to PGS 15 (publication series hazardous substances):

A storage facility must be constructed in such a way that leaked or spilled hazardous liquid is collected in a container. To this end, the collection container must have a capacity of at least 110% of the largest package. However, if 10% of the total content of the packages is more than 110% of the content of the largest package, then the collection capacity must be equal to 10% of the total content of the packages together. The collection container must be sufficiently resistant to the stored liquids.

The collection capacity only applies to liquids. Empty, uncleaned packaging does not count. The collection facility may also be realized in storage. The choice of location for the collection facility may depend on the hazardous liquids stored. Kruizinga.nl is not liable for the type of use!

Please note! Any form of modification is not allowed. If this is the case, all regulations will lapse.

### Specifications

Article arrangement: New

Version: for 1x 200 l drum

Walls: of wire mesh

Top: 1000kg/m<sup>2</sup>

Colour: colorless

Length (mm): 760

Height (mm): 1590

Weight (kg) 113

Type number: 41D

Type: Retention Basin

Material: steel

Floor: with galvanized grid

Subgroup: retention basin steel

Surface treatment: galvanized

Width (mm): 760

Application: stacking - not certified to hoist

Collection volume (ltr): 225

EAN Code (Gtin) 8719424007718
