### Product description

Stackable bread crates are specially designed containers widely used in the food industry, especially for storing and transporting breads, pastries and other bakery products. These crates are made of HDPE (High-Density Polyethylene), a durable and food-safe plastic material that is resistant to moisture, extreme temperatures, chemicals and impact. The perforated walls and bottom of the crates offer a number of advantages:

- Ventilation: The perforated structure of the crates provides good air circulation around the stored products. This is particularly important for bakery products as it helps to reduce excess moisture and maintain the freshness of the products.
- Preventing condensation: Ventilation minimizes condensation inside the crates, reducing the risk of mold and product spoilage.
- Hygiene: The perforated walls and bottom facilitate cleaning and disinfection of the crates. Water and cleaning agents can easily flow through the perforations, maintaining a hygienic environment.

Open handles on the sides of the crates make them easy to lift, carry and move, even when stacked. These handles are designed to be comfortable in the hand and provide a good grip for users. Stackability is an important feature of these crates. They are designed to be stackable on top of each other when empty or when filled with products. This saves valuable storage space in warehouses, transport vehicles and at points of sale. All in all, stackable bread crates offer a practical and hygienic solution for storing, transporting and displaying bakery products. They contribute to the freshness and quality of products while also promoting efficiency in logistics and storage.

### Specifications

Article arrangement: New  
Version: walls + floor perforated  
Walls: open handles  
Food-safe: yes  
Colour: red  
Internal length (mm): 565  
Internal width (mm): 365  
Internal height (mm): 75  
Weight (kg) 0.89

Type: breadbasket  
Material: HDPE  
Floor: reinforced  
Euronorm (mm): 600 x 400  
Length (mm): 600  
Width (mm): 400  
Height (mm): 90  
Volume (ltr): 15  
Type number: 38-BKB
