Product description

Foldable plastic crates that can be easily folded in and out by means of a hinged folding system. The shopping crate with a capacity of 55 liters is particularly easy to open and close and is therefore widely used by large retail companies that also offer delivery services. This shopping crate has perforated walls with a height of 295 mm and a closed bottom and is therefore dirt and air permeable. This way the content is optimally protected. Equipped with 2 open handles for optimal handling. Are you temporarily not using it? Then you can simply stack these crates when folded, which results in a volume reduction of 70%.
