Technical information

Productnumber : 98-8067GB

Product description

A used stacking bin plastic with standard dimensions of 600x400 mm, which corresponds to Euronorm specifications. These uniform dimensions ensure compatibility and interchangeability with other containers and logistics systems that follow the same standard. Made of high quality and durable plastic and resistant to wear and tear, making it suitable for repeated use in industrial environments. The warehouse bin has a capacity of 60 liters, to store a significant amount of goods or materials. Features perforated walls and bottom that help with air circulation and moisture control, which can be important when storing certain goods to prevent mold or condensation. The front grab opening facilitates access to the contents of the bin. This is useful for quick loading and unloading of goods. Features one open handle on the back and closed handles on the sides which facilitates carrying and moving. The storage bins are designed to be stackable with each other, allowing for space saving in storage and transportation. This makes efficient use of available space. Suitable for use in industrial environments, warehouses, distribution centers or other situations where standardized containers are required for storing and transporting goods.

Specifications

Article arrangement: Used
Version: 1 short side open
Walls: open handles
Food-safe: no
Colour: grey
Length (mm): 600
Width (mm): 400
Height (mm): 320
Volume (ltr): 60
Type number: 8067GB

Type: stackable
Material: plastic
Floor: perforated
Euronorm (mm): 600 x 400
Surface treatment: signs of use
Internal length (mm): 550
Internal width (mm): 350
Internal height (mm): 315
Weight (kg) 2
