Product description

Kibo push-up ladder. Lightweight ladder for professional use.

The Kibo is the professional lightweight ladder. Its light weight makes it very handy and easy to set up. The bended beams ensure that you can safely carry out your job anywhere. This ladder is equipped with a square rung tube profile, which makes it extra strong and durable in use. With the Kibo professional lightweight ladder, you can experience your guaranteed reliability and comfort, at any height. You can rely on Altrex.

This push-up ladder is available in 2-part versions with 8, 10, 12 or 14 rungs. Regardless of the compact dimensions of the ladders, with working heights up to 7.65 meters, you can achieve maximum results. The push-up ladder is multifunctional and can easily be slid upwards along the façade. Made for every job, so that you can always work safely.

Light in weight, great in reach

Do you want your ladder to be easy to lift and to reach the highest altitudes? Then you need the Kibo push-up ladder. This ladder is remarkably light for its class, but on the other hand, it is very robust.

Square rung for improved standing comfort

The rungs of the Kibo push-up ladder have a dimension of 2.8 x 2.8 centimeters and ensure that you can stand comfortably during your work. With the durable nature of the material, these rungs also last for years, even with the most intensive use.

Bended beams with extra-wide feet

The bended beams at the bottom of the ladder provide more stability and make it easy to place your ladder in any desired position. And, with the extra wide feet, the ladder has even more grip, giving you even more contact with the surface you are working on.

With the generous rung to rung distance, you reach even further

The Kibo push-up ladder has a standard rung to rung distance of 28 centimeters. This generous distance allows you to stand higher and reach further. So every job is a piece of cake!
